FEMALE PARTICIPANTS WANTED FOR RESEARCH STUDY

WHO?
1. Physically active (at least 30 minutes of exercise 3-5 days a week) women between the ages of 18-35 years
2. Have a VO2max >40ml/kg/min
3. Been cleared by the medical monitor for this study

WHAT?
You will exercise up to 120 min on a treadmill in hot environment. The exercise protocol is designed to simulate the intensities of exercise and breaks during a typical tennis match play. You will exercise at various speeds (i.e. sprinting, running, jogging, walking) on the treadmill with breaks throughout the exercise protocol.

A 10-minute cooling intervention will be performed with 1) cold water immersion, 2) ice towel, 3) cooling vest and 4) passive rest. Additional trial will be 5) no 10-minute cooling.

In total, you will complete approximately 14 hours of laboratory visits within 6-8 weeks.
(1 baseline visit and 5 exercise trials)

Compensation for participation will be provided up to $475
